

THE PARADOX OF SIMULTANEOUS PROCESSING

THE QUADRALITIC CREATIONS OF GOD
AND MANIFESTATIONS OF THE UNIVERSE

An excerpt from

THE TOTALITY OF GOD
AND THE IZUNOME CROSS

Unlocking the Secret to the Riddle of the Ages

Al Leone

While completing the final rewrites of this book, I was reminded of just how energetically imbedded an understanding of the dualistic and triadic nature of the Universe is in our human psyche. It had almost snuck past me in the guise of political satire on the late-night weekly television comedy institution called **Saturday Night Live**. In the opening skit, Will Ferrell and Darrell Hammond were engaged in a brilliant caricature of then presidential candidates George W. Bush and Al Gore. Obviously, neither the actors nor any of the audience could have known that the upcoming election would be the most hotly contested in America's history. But, in retrospect, what struck me most was the thought that these two great political leaders – who represent the very real balance of power that exists in the world between the dualistic principles of Conservative and Liberal, Republican and Democrat – could be deciding the country's fate through a simple, one-on-one game that cuts across all religious, political, racial and economic boundaries. And the winner is the one whose hand displays the most powerful of three weapons based on the simultaneous choice of the loser:

Rock-Paper-Scissors

Remember the rules? Paper covers Rock; Scissors cuts through Paper; Rock crushes Scissors. Children all over the world learn to play some version of this game; but how many ever realize, even as adults, that their simple exchange of hand gestures could be symbolizing the interaction of triune universal powers:

Body-Mind-Spirit

Mind covers Body; Spirit cuts through Mind; Body crushes Spirit. Amazing!

You may have often noted that throughout this book, sentences have been constructed around dualistic oppositions. Like everything else, this is no accident. I'm sure by now you've gotten the reason why. We exist in an oppositional environment, and we constantly express these oppositions verbally to describe our interactions with everything and everyone in it. Our interactions occur in different Spiritual Means (Realms) and Physical Ways (Models), as well as Spiritual Ways (Paths) and Physical Means (Planes).

Words of positive and negative energy and matter don't just have a literal meaning. They begin as figuratively symbolic spiritual and physical substance and form; and the words cleverly imbedded in the last two sentences can easily illustrate this through their quadrality. These are the *Spiritual Model's* Spiritual/Physical + Substance/Form, the *Physical Model's* Positive/Negative + Energy/Matter, as well as one that reflect both models, Figurative/Literal + Symbolism/Meaning.

When you open up the layers of meaning within words, you also open up their energy. Quadrality exists in endless evolution, beginning at the highest levels of the Spiritual Realm. There, they are neither *bound* by the Limitation of Time and Space, nor *pledged* to the Condition of Energy and Matter – and with neither pledged nor bound to the Condition or Limitation of the other. However, Man is not so free of these Conditions or Limitations as God is. The greatest personal challenge God gives us is to learn how to turn life's Negatives into Positives. We need to work with our Limitations as if they were Conditions without any behavioral negativity attached to them. Then, Problems become Opportunities and Handicaps become Challenges.

This leads into the examination of what I'd like to call *The Paradox of Simultaneous Processing*. We've seen how things come into our lives to help us heal, by mirroring our own issues. But no event occurs solely for our own purpose. There is always someone or something else involved simultaneously in that process. Only an unenlightened Ego would believe everything that happens in its life was solely for its own benefit.

Through the Communication of Souls and the Connection between Hearts, we come together for spiritual reasons to heal life-issues. Our souls recognize the things we need to heal in each other's inner mirror. They include the *whys* in our lives. These two knowing Souls then ask their Hearts to emotionally connect the *whos* involved; to lovingly extend to each other their Spiritual Essences, manifested in bodily form as Physical Personalities. Finally, through Compassion and Forgiveness those *whys* and *whos* can find Wisdom and Love.

Thus, the ideological duality of Soul (P) Heart is meant to unite the positive forces within the Spirit of God for our greatest good. However, there are harmful negative forces within the Spirit, such as Criticism and Anger, that if not confronted or left unchecked could literally destroy peoples lives. For instance, what would make someone have so much anger or hurt so much inside that they would choose taking another person's life as the preferred option to easing their inner conflict, and then jump in front of a moving train rather than deal with the Spiritual or Physical consequences? It is a sadness that all Humanity has to bear, to listen to daily news reports of such occurrences.

Wellness (P) Abundance is another multi-faceted duality that exists in the *Physical Model*. When considered together *ideologically*, their energetic opposition exists to benefit Mankind. However, Wellness and Abundance can come into conflict in a *behavioral* balance between Positive and Negative. We may accept that the pursuit of financial abundance is a valid, worthwhile, and essential force in human progress; but should the level of health care ever be sacrificed in the name of greater profit? How do you justify that?

As you continue to explore the words in [Figure 2](#), the balance between them will open you to the Truth therein energetically contained, all in the context of the *Four Aspects of God*: Spiritual, Physical, Positive, and Negative – a.k.a. the *Four Powers of the Universe*. (205) For instance, any addict can testify to the power lost when in the grip of an Addiction. After all, *Will-power* is the energy you lose when self-expression is not in accord with Universal Truth. Thus, we must first align our truth with that. And how we then express our personal truth isn't only through *Words*. It's also, and more importantly, through *Deeds*. If you're speaking your truth but not living by it, in a sense you're a fraud. Do you really want to go through life like a spiritual criminal?

We also lose Energy through our Attachments. These are things that mean more to us than our Goals. They *destroy* our Motivations, and are the Core Issues keeping us from moving forward in life. *Physical* Attachment forms a *double negative* with *spiritual* Addiction. While our Attachments immobilize us, we feel trapped by the things we can't resist. Our Addictions *corrupt* our Dreams. They prevent us from realizing our Spirit's true Physical Purpose, which manifests within Mind and Body: Soul's primal Desire – *Oneness*, and Heart's primal Passion – *Being*.

The strength to release our Addictions and Attachments so we can get things done comes from inside us. But, whether you choose to call its Origin the Impersonal Grace of God or the Personal Power of Man, *the Source* it flows from is the same.

Material specialization exists in the Physical Realm, not the Spiritual. Either energy can help you turn your life around. Together they can be unstoppable.

205 *(In case you were wondering if this meant there were Universal parallels to The Quadralitic Creations of God on p. 578, it does. Since this is the actual point in the creative process at which these came to me, I'll share them with you now:*

THE FOUR QUADRALITIC MANIFESTATIONS OF THE UNIVERSE:

Aspects

Realm/Model // System/Structure

Properties

Substance/Form // Energy/Matter

Powers

Spiritual/Physical // Positive/Negative

Functions

Expand/Contract // Create/Destroy

As a 4x4 grid:

Realm/Model // System/Structure
Substance/Form // Energy/Matter
Spiritual/Physical // Positive/Negative
Expand/Contract // Create/Destroy

You will note two direct connections between the Creations of God and the Manifestations of the Universe. The Created Aspects of God – Spiritual, Physical, Positive, and Negative – are the same as the Manifested Powers of the Universe. Thus, through the dualistic relationship of God's Aspects and the Universe's Powers is revealed that God's initiating Principles of Intangibility are in horizontal, parallel alignment with the Universe's initiating Concepts of Tangibility.

The other connection occurs in the vertical, perpendicular alignment that the Creations of God and the Manifestations of the Universe have in common – Aspects, Properties, Powers, and Functions.

As previously promised, to the triune System, Realm, and Model – the manifestation of 3 dimensions in the Tangible Spiritual Realm – has been added Structure. Structure is the quadralitic ingredient within System needed for the procreation of 3 spatial dimensions in the Tangible Physical Realm with the addition of a temporal dimension – Time. Obviously, the Principle of Intangible Structure – inherent in universal order – is in evidence everywhere in the Axes, Planes, Grids, and Cubes that lead up to Tangibility; but the Concept of Tangible Structure can only be actualized through material form. And I think it is quite appropriate that the Universe's Functions in the Physical Realm become not just to Create form, but to Destroy it, as well. This provides insight into the pairing, in the Quadralitic Creations of God, of the Property of Limitation with the Function of Give. Combined with the Universe's Power of Negative, manifestation necessitates the completion of the cycle – Give and Take!)

Author's Note: For completeness, The Four Quadratic Creations of God have been included out of sequence.

THE FOUR QUADRATIC CREATIONS OF GOD:

Aspects

Spiritual/Physical // Positive/Negative

Properties

Ideology/Behavior // Condition/Limitation

Powers

Soul/Heart // Mind/Body

Functions

Light/Love // Guide/Give

As a 4x4 Grid:

Spiritual/Physical // Positive/Negative
Ideology/Behavior // Condition/Limitation
Soul/Heart // Mind/Body
Light/Love // Guide/Give

Before leaving this magical 4x4 configuration, consider the names of the *Four Creations* as their own quadrality and place them in relation to the terms within the fourth, illustrating, through the juxtaposition of Vertical and Horizontal, a powerful Universal Truth:

Aspects/Properties // Powers/Functions
Light/Love // Guide/Give
